

## New Dowells Catch Report October 2012

There are a few clear spots were it tees of across the fields with no fencing, most of the fence is only two feet high, you can catch and land fish over it in places.

There's loads of carp in there, mainly commons with just a few mirrors.

I've had a few out; all small commons up to about 12lb and the mirror but I've seen a lot bigger.

When it's hot in the summer they cruise about on top all day but won't take floating baits, had all my fish stalking with a float rod using hemp and sweet corn.

The farmers cleared all the weed now and the water levels have dropped, it doesn't look that appealing now but mid-summer its lovely, had it to myself too.
